**Frostbound throne song of night**

This weekend at a nightclub in Harvard Square, Belle Linda Halpern will sing her favorite songs from several popular musicals, including Pirate Jenny from The Threepenny Opera and Something's Coming from West Side Story, but now she's helping me in the show - and I'm the one who blasts into music, Halpern, co-founder of Ariel Group, Inc., of Cambridge, a successful cabaret singer who still performs at least once a month. The rest of the time, she coaches businessmen on how to present more efficiently by communicating more emotionally. We track your train and we admire you for your logic. But we want to connect with you as a person, we need to see how you feel about things. I turned to Halpern for advice on how to talk, I was set to send it to 80 people. Suggest a point. Point two, summary, through Nodot. I think I need professional help. After listening to me, Halpern agrees. Instead of using logic to create a transition (now you understand my first point, let me change it to my second point). Should I use expressive hand gestures and add emotional colors to my face? I'm not saying you're a flamboyant Halpern mentoring that, but we need to see how you feel about things, so we try to exercise, Halpern assigns me a topic (my neighborhood) and asks me to start talking every 10 seconds she calls a different emotion - love, hate, humility, happiness - which I make changes. Expression (I love people and a sense of history in my neighborhood. I hate it when I learn about crime on my blog). Time and again Halpern pushed me to communicate with tools other than my voice. If I'm deaf or in the back row – I should know with your body language what you're talking about, in fact, my voice is the next big challenge. Explaining my voice that monotone assumed it had a voice at first, so it was time for another exercise involving Shakespeare, Halpern asked me to recite four lines of text from The Tempest using a different voice for each line. Do not be afraid (Ethel Merman shouts across the street); Ailes is full of voices (high-profile speakers from Seinfeld whispering in your ears), Sounds and sweet air (James Earl Jones yawns), that gives no joy and hurt (Kenneth Branagh plays king), the idea, she explains, is to stretch your voice just as you stretch the elastic band. It snaps back, but it's more flexible than before you stretch it. The biggest problem is my reluctance to stop - a flaw in the general presentation. I'll make a point and then hurry into the sample without letting the spot sink in. I know stop feeling like gargantuan a number of times when you're there, Halpern. Sympathy, but for the audience, It says, 'I think this is important enough to give you a moment.' What I do has the same purpose: just stop talking. Who would have thought it might be involved? Suggest stopping, crowd, scary faces. Highs, at one point, stop, exciting hand time. Siskel and Ebert, where are you? Contact Belle Linda Halpern arielgroup@aol.com . Winter is here and as the final season of Game of Thrones, fans of the show are no strangers to conflict and war, since one family or empire has fought and killed its way to victory since the start of the series. All are hoping to claim the throne and rule the seven kingdoms. Now the internal battles must be paused so that they can fight against common enemies: white walkers and their armies. From the beginning, we had a loud threat of the night king hiding in the cold shadows. Now the battle is open, as the night the king has broken through the walls. It is not easy to consider his army is made up of undead, coupled with the fact that the night king seems to have a different power than we have seen so far. He can fill his forces as needed, making us wonder if he can be defeated at all. Here's everything we know about the night king, both the characters and the actors — until now, who's the Night King? Night King is the leader of White Walker and White. He controlled his army without words, and they followed without trampling. Everything about this king is intimidating from his crazy blue eyes to his frozen and rugged crown. In previous episodes, we have seen the boy of the forest transform him from one of the first to the Night King. By jumping the 'dragon' dagger into his heart, they create the first white walker in the hope of protecting himself from the first man. That plan was reversed when he opened it and built an army. The jury is still out on whether The Night King can kill, but we know little about who plays the epic villain. Who plays The Night King in 'Game of Thrones' now we'll see more Night King, let's talk about the people who play him. Vladimir Ferdick, a Slovak actor who has played king since season 6, hasn't heard his voice yet, but we've seen his face without makeup once before the wild boy turns him. Another actor, Richard Brake, plays the part of Night King in two episodes: once in season four and again in season five. If you look closely, you'll see a slight difference in the shape of the face, but most of everything looks the same, as the brake scheduling paradox needs to give up the role, that's when Ferdick took control of this part. Who is Vladimir Ferdick? Night King is not Furdik's first role. Furdik's throne has been set up as a stunt pair for the show since the start of season one. He has also worked acrobatics for Skyfall, Spartacus, Hercules and Snow White, and hunters based on Scoop Whoop, he's also a stunt partner for Christopher Eccleston and Malekith in Thor: The Dark World in 2013. As the show heads to its conclusion, we can expect to see The Night King progress further in Westeros, creating even more chaos in his wake. We've seen him use one of Daenerys's dragons to turn it into a more dangerous weapon that can fall down the wall. It's not clear what night King could have been killed, and we still don't know what his real motive is. What we do know is that he wants something in Westeros and no one in his path is safe. One thing is for sure, this season will be the HBO assassin The Battle of Winterfell gets and disappears, and the epic battle between life and the dead becomes kind of... well, briefly, fans are surprised when the existential threat, which has been looming insidiously over the show since its first episode, was quickly delivered by a surprise stealth attack from Arya Stark, but there are also many unanswered questions when it comes to the mysterious leader of the White Walker Night King. Why is the Night King immune to dragon fire? The series, based on a book based on Game of Thrones, is titled A Song of Ice and Fire, and fans of the show have taken the lead, meaning that eventually two important supernatural elements, White Walkers and Dragons (representing ice and fire), will meet while preparing for battle. A long night, Arya asked Bran if the dragon fire would kill the White Walker, which he replied: I don't know. Some viewers have taken it, meaning that he is one of the original Targaryens, and therefore immune to dragon fire, just as Daenerys is totally possible that show runners just want to break audience expectations and present The Night King as invincible, which of course adds to the shock value of the twist that ends in Godswood. In the first episode of season eight, Winterfell Night King uses umber family limbs to create gruesome artworks that Last Hearth spirals into a replica of a circle of trees where the children of the original forest transform him from man to night king. He just co-opted their pictures for himself or sent some. Of the message? Other fans have speculated that the spiral resembles the three-headed dragon sigil of House Targaryen, which supports the theory that before he was turned, the night king was Jon and Danny's ancestors. We probably won't know right now. How's it coping with winter now? We have been told ominously and over and over again over the years that winter is coming. The existential threat posed by White Walker was confirmed by George R.R. Martin himself as a metaphor for climate change. I don't know what to say, he said in an The people of Westeros are fighting an individual's struggle over power and status and wealth, and these things distract them so much that they ignore the threat of 'Winter is coming', which has the potential to destroy them all and destroy their world. This content is imported from {embed-name}. White Walker has been presented as the identity of the cold and unyielding darkness of winter. Now that they are sent, will summer return to Westeros soon? It's unlikely that the show will spend the rest of its time answering these questions, so we'll have to hope that George R.R. Martin addresses them when the winter wind is finally published.
